## PnP-1234-4 v2

### The Classic 1234 Rundown for Pick 4 Pencil & Paper Version

#### Instructions:

Write the last draw of your PICK 4 lottery into the first Circle row (ABCD) on the left.

Note that each circle is assigned a letter starting with A. The letters help you find your play selections.

Now you add 1, 2, 3 or 4 to the digit on the top according to the formula listed and write the result in the circle below starting with A+1=E, B+2=F, C+3=G, D+4=H. If the result is 10 or higher use only the last digit of the result. Complete the same calculations on each new row until you reach k+1=o, l+2=p, m+3=q and n+4=r. **And you are done!**

Did you calculate right? If you did the bottom row opqr should be the same as the top row ABCD. **Congratulations!**

This workout creates 9 basic combinations you can play or choose from: EFGH, IJKL, MNOP, QRST, UVWX, Yzab, cdef, ghij and klmn.

**Suggestion:** If the most recent draw was a **double** (one digit occurs twice in the draw), a **triple** (one digit occurs three times) or even a **quadruple** (all digits are the same) use the most recent **single** (all digits are different) to start out with.

**Good Luck!**

We hope you enjoy completing this little workout as much as we enjoyed putting it together for you. If you like it please visit the Pencil & Paper Workout Area at <http://www.pick34.com/paper> for more workouts and donations. Thank you and God bless!

**For Entertainment Only!**
