Instructions:

Write the last draw of your PICK 4 lottery into the first Circle row (ABCD) on the left (Start).

Note that each circle is assigned a letter starting with A. The letters help you find your play selections.

Now you add 6 to the digit on the top and write the result in the Circle below starting with A+6=E, B+6=F, C+6=G, D+6=H. If the result is 10 or higher use only the last digit of the result. Complete the same calculation on each new row until you reach T+6=X. Now you are done!

Did you calculate right? If you did the row UVWX should be the same as row ABCD. Congratulations!

This workout creates 4 basic combinations you can play or choose from:
EFGH, IJKL, MNOP and QRST.

Optional:

If you need a few more numbers you can also try some of the following combinations:
EFIJ, GHKL, MNQR, OPST and
EIMQ, FJNR, GKOS, HLPT.

There are no limits. Can you find more combos?

Good Luck!

Optional: If the most recent draw was a **double** (at least one digit occurs twice in the draw), a **triple** (one digit occurs three times) or even a **quadruple** (all digits are the same) use the most recent **single** (all digits are different) to start out with.

We hope you enjoy completing this little workout as much as we enjoyed putting it together for you. If you like it please visit the Pen & Paper Workout Area at <http://www.alspick34.com/paper> for more workouts and donations. Thank you and God bless!
